CCP Games

Dear Hiring Manager

I am excited to apply for the Data Engineer position at CCP Games. As a native Icelandic with a strong background in data engineering and analytics, I am eager to bring my expertise back home after completing my MBA at the University of Indianapolis in May 2025. With a Bachelor's degree in Data Science and a concentration in AI & Data Analytics, I have developed a solid foundation in data infrastructure, SQL optimization, and cloud-based data solutions.

During my internships at Avanade as a Data Engineer, I worked on designing and optimizing SQL queries across multiple databases, contributed to the foundational development of an MDMF database, and rapidly acquired Power BI data transformation skills. Additionally, I took on leadership responsibilities as an alternative Scrum Master, facilitating daily standups and ensuring seamless project execution. My experience with Python, SQL, cloud platforms, and data modeling aligns well with CCP's need for scalable and real-time data infrastructure.

I am particularly drawn to CCP Games' mission of continuous improvement and innovation in virtual experiences. The prospect of collaborating with talented professionals to enhance real-time analytics excites me, and I am eager to contribute my technical expertise and problem-solving skills to your team.

I would welcome the opportunity to discuss how my background and skills align with CCP Games' needs. Please feel free to contact me at Binnatr@gmail.com. I look forward to the possibility of contributing to your team.

Sincerely,

Brynhildur Traustadóttir
